

Microplane
Personal Care

Transform Your Soles

FOOT CARE PRODUCTS FOR BABY SOFT SKIN.

THE MICROPLANE® SECRET:

- **Microplane® technology**
- **The original micro-file design**
- **File surfaces Made in the USA**
- **Surgical grade stainless steel**
- **No-mess skin receptacle**
- **No need to soak feet before use**
- **Tough calluses and dry skin quickly disappear**

The secret of Microplane Foot Files and Buffers lies in over 40 years of precision metals manufacturing and engineering expertise, resulting in original and leading “edge” technology. The latest application of a unique Microplane etching process created the innovative “micro-file” design, which established Microplane foot files as the new performance standard in foot care. Removing skin in dust like particles, the tiny files are immediately effective, amazingly easy, and surprisingly gentle. This revolutionary line of foot care tools quickly and effectively removes tough calluses and dry, unsightly skin, leaving feet feeling smooth and refreshed.

Microplane Foot Files and Buffers are professional grade tools that are simply designed to make proper foot care quick, easy, and safe. All Microplane file surfaces are made in the USA and are of highest professional grade quality. As a result, Microplane provides tools that offer superior quality, long lasting performance, and best of all, deliver smooth, baby-soft feet. Trust your feet to Microplane and Transform Your Soles®.

THE COMPANY:

From the woodshop... to the kitchen... to the salon...

Microplane® products deliver an unexpected and delightful experience to people who simply desire products that make their lives easier. Since 1990, Microplane has been winning the hearts and hands of people around the world through the superior performance of Microplane original technology.

First applied to improve the performance of woodworking tools, Microplane technology blossomed to even greater acclaim when introduced as a series of food graters and zesters. The latest innovation comes in the form of the Microplane Foot File, which has established the new standard in foot care.

Microplane products deliver maximum results with minimal effort. Put the power of Microplane products to work for you and discover the Microplane difference.

Headquartered in Russellville, Arkansas, Microplane Woodworking, Culinary, and Personal Care products are distributed throughout the world via its North American and European operations. Microplane currently owns multiple patents and produces over 400 products.
