

A black Microplane Garlic Slicer is shown disassembled on a white marble surface. The main unit is open, revealing a stainless steel blade. A black lid with a scraper is placed to the right. A small glass bowl contains several thin, evenly sliced garlic pieces. In the background, there are several whole red tomatoes and a head of garlic. The Microplane logo is visible on the lid and the main unit.

**Microplane**  
THE ORIGINAL®

# NEW Garlic Slicer

Designed to make prepping garlic into thin slices fast, effortless, and with minimal hand contact, Microplane® introduces its expertly engineered and seriously sharp **Garlic Slicer**. Featuring an original, made in the USA Microplane blade, the Garlic Slicer eliminates the need for knife skills, or the use of potentially hazardous mandolin-like tools, to create thin, evenly cut garlic that retains all of the aromatic's natural oils for optimum flavor. Hands remain odor-free when preparing an array of dishes featuring garlic. Extremely easy and fun to use, simply remove the lid and place cloves in the large capacity hopper. Place the cover back on top and move the cover back and forth. Within seconds, evenly cut garlic slices fall into the clear-view lower chamber. A removable scraper is integrated into the lid for scraping the bottom of the blade, as well as scooping prepped garlic out of the container.

## Features:

- Makes thin evenly sliced garlic for enhanced flavor
- Quickly slices garlic without hand to blade contact
- Large capacity chamber accommodates 2-3 peeled cloves
- On board scraper removes garlic from the blade and container
- Original Microplane stainless steel blade is made in USA
- Top rack dishwasher safe
