

# Live and Lime!

## The Food: Limes

Originating from south Asia, limes are vibrantly colored, mouth-puckering members of the citrus family. Compared to their more popular cousin, the lemon, limes are generally smaller, have a thinner rind, and more acidic pulp. The juice and zest of limes are essential ingredients in a diverse range of regional cuisines, such as Mexican, Thai, and Vietnamese. The juice adds a complex acidity to guacamole and curries, and a touch of zest brightens up rich desserts. The green peel or wedges of the fruit also make an ideal garnish for salads, dips, or appetizer platters. Perfect for spring cooking and entertaining, lime juice, zest and decorative peels refresh the palate and herald the beginning of lighter, refreshing foods and beverages.
