

Trim

Strip

SwiftStrip

Crafted in durable stainless steel, the SwiftStrip is a uniquely curved tool that combines holes to easily strip off the leaves of herbs and leafy greens with a razor-sharp, beveled edge blade at the end for trimming stems. A boon to anyone keen on eating clean and adding more green vegetables and fresh herbs to their diet, the SwiftStrip offers a mixture of different size holes to make it a cinch prepping all types of herbs and “super food” leafy greens. The tool’s largest hole is specifically sized to accommodate trendy and delicious Tuscan kale (also known as lacinto, dinosaur and palm tree kale), which is characterized by its extra long and thick leaves. A mixture of different size holes make it easy to use the SwiftStrip to prep a wide range of herbs and other types of leafy greens.

Features:

- Razor-sharp, beveled edge blade for trimming stems
- Large holes to accommodate various types of kale and chard
- Small holes to accommodate an array of finer herbs
- Dishwasher safe
- Reusable cover to protect the blade in storage
